PROJECTS

Go-Kart Project (Team Manager)

Led a multidisciplinary team in the design, fabrication, and testing of an electric go-kart, overseeing project planning, task allocation, resource management, and team coordination. Collaborated with members across mechanical, electrical, and software domains to ensure successful vehicle development, performance optimization, and timely project completion while strengthening leadership and project management skills.

Vehicle Telemetry System Project

Developed a real-time vehicle telemetry system that uses a mobile application to track and monitor vehicle location and performance data. Integrated GPS and sensor technologies to capture parameters such as latitude, longitude, and vehicle speed, enabling live tracking and analysis through a user-friendly app interface. The system improved vehicle monitoring capabilities and provided valuable insights for performance evaluation and route tracking.
